

Discussion: Running Core & Horizon

Tom Llewellyn-Smith, Stellar Development Foundation
Konstantin Richter, CEO & Founder, Blockdaemon

- Agenda
 - Configuring Quorum Sets
 - Monitoring Core
 - Launch a Blockdaemon node
 - Discussion / Questions

Read That Fine Manual!

- <https://www.stellar.org/developers/stellar-core/software/admin.html>
- <https://www.stellar.org/developers/horizon/admin.html>
- <https://github.com/stellar/packages/blob/master/README.md>

Demo Time! :)

<https://github.com/brahman81/core-monitoring-demo>

Quorum Sets

- Integral part of SCP, configures fault tolerance, who we trust
- Greatly simplified format since v11
- Stellarbeat.io - quorum monitor

stellarbeat.io

Organizations

Monitoring

- We use Prometheus and Grafana
- core exposes its metrics natively on <http://localhost:11626/metrics>
- stellar-core-prometheus-exporter (<http://localhost:9473/metrics/>)
- SDF Grafana dashboards (<https://grafana.com/orgs/stellar>)
- stellar-account-prometheus-exporter

```

Tips & Tricks

- stellar-core
 - Prefer to connect to a local core database over unix domain sockets
 - Use the fastest disk available (buckets/database)
 - Monitor your nodes!
- stellar-horizon
 - Backup your Horizon database (cloud snapshots, pg_dump, etc)
 - If using SSD storage set random_page_cost = 1
 - stellar-horizon db reingest range is your friend

Thanks!

Any questions <https://keybase.io/kranon>
